

Data Dictionary

<u>Term</u>	<u>Definition & Information</u>	<u>Aliases</u>
Player	An entity participating in the game. A player can be human or computer-controlled (AI). Each player has attributes such as a player number, color, score, and difficulty (if computer).	Participant, User
Player Count	The number of players in a game session (2, 3, or 4).	# of Players
Game Mode	Specifies whether the game is human-versus-human or human-versus-computer.	Mode, Play Mode
Difficulty Level	Determines the AI's style of play. Can be set to <i>Easy</i> or <i>Hard</i> .	AI Setting
Board	The virtual representation of the Kivi board. Typically modeled as a data structure containing cells or slots where marbles can be placed.	Kivi Board, Game Board
Marble	The individual marker or piece each player controls or places on the board.	Marker, Game Piece
Move	A single action taken by a player during their turn (e.g., placing a token, capturing another piece, etc.).	Turn Action
Turn	The point in the game at which a specific player is allowed to make a move.	N/A

Round	A cycle in which each player (in a multiplayer game) has had one turn.	Cycle
Score	The total points a player has accumulated. Scoring rules are determined by the Kivi game mechanics.	Points
Game State	The complete snapshot of the current game, including positions of pieces, scores, turn order, and any other relevant status.	State
Save File	A file or data structure used to store the Game State for later retrieval, allowing the user to resume a game session.	Saved Game, Save Data
Session	An instance of playing the game from start to finish, or until a save point.	Playthrough
Color Scheme	The set of colors (and/or symbols) used to represent different players or pieces. Must account for color vision deficiency to ensure accessibility.	Theme, Palette
Color Vision Deficiency	A condition affecting a user's ability to distinguish certain colors. The game should provide an accessible Color Scheme (or shapes/patterns) to avoid stigmatizing and to ensure readability.	CVD, Color Blindness Mode
Human-Versus-Human	A mode where all players are controlled by humans (local or network play, depending on design).	H2H
Human-Versus-Computer	A mode where one or more players are AI-controlled.	H2C
Kivi	The name of the original board game being computerized. The computerized version must follow the core mechanics of the physical board game.	N/A
